Senegal energy storage lithium battery

Overview

Which energy company is building a lithium ion battery storage system in Senegal?

Renewable energy company Africa REN has started construction of the Walo Storage project - a lithium-ion battery energy storage system situated in northern Senegal.

When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector.”.

What is a lithium-ion battery energy storage unit?

The lithium-ion battery energy storage unit is the first battery-storage project in West Africa dedicated to frequency regulation and is designed to stabilize Senegal’s grid and reduce blackouts.

Is this the first battery storage project in West Africa?

The developer claimed it is the first battery storage project in West Africa dedicated to frequency regulation, and will provide stability to the local grid in the face of limited spinning reserves and intermittent renewable generation.

What is battery storage?

Battery storage is technically and economically more competitive than conventional spinning reserve technologies. Combining photovoltaic solar with a storage system is a unique solution to meet the current and future needs of the grid. In order to complement and intensify our local impact, Walo Storage is committed to :

Aug 12, 2025 · Described as a first for West Africa, a solar PV installation with battery

storage project dedicated to frequency regulation has been commissioned in Senegal.
The Walo ...

4 days ago · Characteristics of the project Project : 10MW / 20MWh Battery storage + 16 MW of solar energy Location : Bokhol, Senegal Batteries: Lithium-ion Technologies : Monocrystalline ...

Oct 27, 2025 · Senegal: Battery Storage and Pumped Hydro Storage Overview Senegal's energy sector is undergoing significant transformation, driven by the need to integrate renewable ...

Jul 26, 2024 · The project features a 10 MW / 20 MWh battery storage with lithium-ion batteries and 16 MW of solar energy using monocrystalline modules, a single-axis tracker system, and ...

Nov 4, 2023 · Infinity Power and Senelec have signed a 20-year Capacity Change Agreement (CCA) to provide 160MWh through a battery energy storage system (BESS) The project will ...

Jul 23, 2024 · The lithium-ion battery energy storage unit is the first battery-storage project in West Africa dedicated to frequency regulation and is designed to stabilize Senegal's grid and ...

4 days ago · Characteristics of the project Project : 10MW / 20MWh Battery storage + 16 MW of solar energy Location : Bokhol, Senegal Batteries: Lithium-ion Technologies : Monocrystalline modules / Single-axis tracker ...

Jul 23, 2024 · The lithium-ion battery energy storage unit is the first battery-storage project in West Africa dedicated to frequency regulation and is designed to stabilize Senegal's grid and reduce blackouts.

Jun 26, 2023 · GMO and PIDG will finance a battery energy storage project in Senegal, the 'first dedicated to frequency regulation' in the region.

Aug 11, 2025 · The on-time commissioning of Walo Storage demonstrates our ability to support Senegal's energy transition using cutting-edge technology.

Aug 8, 2025 · The West African nation, where over 60% of the population have access to electricity--one of the highest in the sub region--aims to achieve universal energy access by ...

Jun 26, 2023 · GMO and PIDG will finance a battery energy storage project in Senegal, the 'first dedicated to frequency regulation' in the region.

Aug 12, 2025 · Grid Frequency Regulation and Emergency Supply A key feature of the Walo Storage facility is its ability to provide critical stability and backup power during outages for ...

Jul 26, 2024 · The project features a 10 MW / 20 MWh battery storage with lithium-ion batteries and 16 MW of solar energy using monocrystalline modules, a single-axis tracker system, and string inverters. The offtake is ...
