Share of new energy storage in ASEAN

Overview

The ASEAN energy storage market structure is characterized by a mix of global technology conglomerates and specialized energy storage providers, with international players holding significant market share due to their advanced technological capabilities and established presence in the region.

The ASEAN energy storage market structure is characterized by a mix of global technology conglomerates and specialized energy storage providers, with international players holding significant market share due to their advanced technological capabilities and established presence in the region.

The ASEAN energy storage market is segmented by type (pumped-hydro storage, battery energy storage systems, and other types), application (residential, commercial, and industrial), and geography (Indonesia, Vietnam, the Philippines, Malaysia, and the rest of ASEAN). The report offers the market.

The ASEAN Energy Storage Market size is estimated at USD 3.55 billion in 2025, and is expected to reach USD 4.92 billion by 2030, at a CAGR of 6.78% during the forecast period (2025-2030). In 2020, due to the COVID-19 pandemic, many power projects were halted because of pandemic, namely in.

As the global shift toward clean energy accelerates, the ASEAN region continues to emerge as a key growth hub for new energy and storage solutions. From January to May 2025, Southeast Asia has witnessed a surge in clean energy developments, with large-scale solar, wind, and battery storage projects.

Share of new energy storage in ASEAN

To fuel this growth, the demand in primary energy is projected to more than double from between 2017 and 2040, from 625 MTOE in 2017 to 1,589 MTOE in 2040 in the baseline scenario, ...

As the global shift toward clean energy accelerates, the ASEAN region continues to emerge as a key growth hub for new energy and storage solutions. From January to May 2025, Southeast ...

Residential energy storage is growing in the ASEAN energy storage market, driven by rising demand for solar energy storage systems, energy ...

Battery Energy Storage Systems (BESS) is a rapidly emerging market segment in ASEAN countries. The rise in renewable energy consumption is expected to boost BESS ...

Zones and Corridors Develop Green Energy Zones and Corridors, combining renewable energy resources, infrastructure, and storage to optimise sustainab.

The ASEAN energy storage market, encompassing countries like Indonesia, Singapore, Thailand, the Philippines, and others, presents a significant growth opportunity.

This paper explores the role of BESS in the ASEAN energy landscape, examining current trends, benefits, challenges, and the pathway towards optimising its potential across the region.

Indonesia and Thailand are anticipated to dominate the ASEAN Energy Storage Market, driven by their significant investment in renewable energy projects and supportive

government policies.

Residential energy storage is growing in the ASEAN energy storage market, driven by rising demand for solar energy storage systems, energy independence, and cost savings.

The ASEAN energy storage market structure is characterized by a mix of global technology conglomerates and specialized energy storage providers, with international players ...

The ASEAN energy storage market is experiencing significant growth, driven by the increasing deployment of renewable energy, growing energy demand, and supportive government policies.

Indonesia and Thailand are anticipated to dominate the ASEAN Energy Storage Market, driven by their significant investment in renewable energy projects and supportive ...
