Solar Direct was established in 2013 and has become a major supplier of quality residential and commercial solar and backup systems at the most affordable prices in Guyana.

Our premium-grade solar panels deliver high performance even under intense tropical sun. Designed for durability and efficiency, they help you cut your electricity bills while powering your home or business sustainably.

Wholesale suppliers supply a wide range of panels, including Rooftop Solar Panels and Utility-Scale Solar Panels. The manufacturers listed on our website supply wholesale solar panels that can help you cut down on your buying cost and provide you with the scope to earn more revenues.

At Farfan & Mendes, we service what we sell. We provide only Tier 1 solar panels at internationally competitive prices with the highest performance efficiency available on the market guaranteeing longevity and return on investment. How many solar panels will be installed in Guyana in 2019?

In addition, 1.184 MW of solar PV systems will be installed at 80 public buildings in all 10 Administrative Regions of Guyana in 2019. These installations will result in estimated savings of G\$114 million and avoiding 1,415 tons of CO₂ emissions per year.

How is solar energy used in Guyana?

In Guyana, solar energy is used for several purposes, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural

areas. Under the Hinterland Electrification Programme, in excess of 19,000 solar PV systems had been installed in nearly 200 communities by 2018.

Is Guyana a good place to install solar PV?

As a result, most locations across Guyana have excellent solar insolation levels and are ideal for solar PV generation. As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh.

How many solar PV farms will Guyana have?

The main electric utility, Guyana Power and Light Inc. (GPL) is preparing plans for 3 utility scale solar PV farms totaling 30 MW for the national grid in the long term, as well as 0.75 MW Solar PV Farm at Wakenaam and a 4 MW Solar PV Farm at Onverwagt in the near future.

What is Guyana's main source of energy?

Guyana is currently dependent on imported petroleum-based fuels as its main source of energy.

How much solar power does the government have?

Additionally, during 2017 and 2018, the Government implemented under its Green Public Sector programme solar photovoltaic (PV) systems with a combined capacity of 3.02 MW on the rooftops of 175 public or government buildings.
