# Solar panel company expands production

## Overview

---

First Solar (Nasdaq: FSLR) announced in its Q3 2025 earnings report that it will open a new 3.7 GW annual capacity solar module finishing line in the United States. The module assembly plant is expected to commence operations in Q4 2026 and ramp up production through the first half of.

First Solar (Nasdaq: FSLR) announced in its Q3 2025 earnings report that it will open a new 3.7 GW annual capacity solar module finishing line in the United States. The module assembly plant is expected to commence operations in Q4 2026 and ramp up production through the first half of.

The company's share price jumped 15% following its Q3 earnings call, which included the announcement of a factory that is expected to produce over 8 million finished solar panels per year at full capacity. First Solar (Nasdaq: FSLR) announced in its Q3 2025 earnings report that it will open a new.

First Solar (Nasdaq: FSLR), the US's largest solar panel maker, announced it will open a new 3.7-gigawatt (GW) factory in the US to finish production of its Series 6 modules started at its overseas factories. Production is expected to launch at the end of 2026 and ramp up through the first half of.

Company increases new manufacturing facility investment to \$1.5 billion, adding 400 new high-paying advanced manufacturing jobs for a total of 1,500 in Saginaw County, Mich. HEMLOCK, MICH. — Corning Incorporated (NYSE: GLW) today announced an acceleration of its advanced manufacturing operations in.

The US manufacturer First Solar plans to build a new 3.7 GW factory, aimed at pushing more CdTe solar cell technology into the US market (cropped, courtesy of First Solar). Support CleanTechnica's work through a Substack subscription or on Stripe. The US solar industry will fail to meet.

With incredible speed, Corning announced in its Q3 earnings call that it has brought its Michigan silicon ingot and wafer factory online. The plans for the solar factory were first publicly revealed in October 2024. The facility is on Corning's Hemlock semiconductor campus, and Hemlock polysilicon.

CARTERSVILLE, Ga. – June 9, 2025 – Qcells, a premier provider of complete energy solutions and leader in the global solar manufacturing market, today announced the formation of EcoRecycle by Qcells, a new vertical for the company in solar panel recycling. As the first generation of solar.
