Solomon Islands communication base station inverter connected to the grid 6 25MWh

Overview

What's new at Solomon power station?

The project was completed by MAN diesel for over SBD120m. The new station has been commissioned and is currently in operation. Furthermore to improve the reliability Solomon Power invested in a new 11 kV switchboard, two 1.6 MW diesel generators and two new power transformers at Honiara Power Station.

Is Solomon power constructing a new outstation in malu'u?

This is the first time in 31 years that Solomon Power is constructing a new outstation the last one being in Malu'u. The scope includes solar panels, battery storage system, back up diesel generator and 415 V distribution network to connect about 200 customers at each of these sites in Western Province and Choiseul Province.

What is Solomon power's capital expansion programme?

With a capital expansion programme of over SBD1 billion, Solomon Power strives to develop and implement its planned capital and infrastructure projects over the next five years that will support its mission to provide a safe, reliable and affordable supply of electricity to the Solomon Islands.

This system was designed to reduce the cost of grid power to the Royal Solomon Islands Police Maritime Unit. Also fitted was a 100kVa generator in the event that the grid goes ...

Solomon Islands Nears Completion of 161-Tower Rollout With less than two provinces left before completion, the proposed rollout of 161 towers across the Solomon Islands is nearing its final ...

This system was designed to reduce the cost of grid power to the Royal Solomon Islands Police Maritime Unit. Also fitted was a 100kVa generator in the event that the grid goes down.

The technical requirements are outlined in the 'Technical Arrangements for Grid Connection of Photovoltaic Systems via Inverters' document. This includes aspects like inverter rating, ...

The technical requirements are outlined in the 'Technical Arrangements for Grid Connection of Photovoltaic Systems via Inverters' document. This includes aspects like inverter rating, ...

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or business premises. Sources of ...

Inverters are the main component of grid connected PV systems. It is a power electronic converter which converts DC power from panels into AC power as compatible to grid.

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or ...

The small island nation of the Solomon Islands is located in the Pacific Ocean and has a population of around 600,000 people. The majority of the population lives in rural areas where ...

The project aims to construct 161 3G/4G wireless communication base stations across nine provinces in the Solomon Islands. Once completed, the project will significantly ...

This document explains the technical requirements to connect a photovoltaic (PV) inverter system to the supply system (the grid) of the Solomon Islands Electricity Authority T/A Solomon Power.

Under phase I as well, a pilot project funded by JICA for introduction of grid-connected PV

generation totaling 50 kW was mounted on the car garage and fed directly into the grid
...

It is important to ensure that your grid connect inverter complies with Australian Standards. This is necessary to ensure that SIEA will allow it to be connected to the grid.
