

## **PDEOZE PowerContainer**

# **Solomon Islands household rooftop solar panel manufacturer**

## Overview

---

Can solar panels be connected to the Solomon Islands grid?

There is an increasing number of products and suppliers on the market, most of which will be able to be connected to the Solomon Islands grid. Solomon Power follows the Australian/ New Zealand standards for connection of solar panels to its electricity grid.

Are solar power systems a viable option for the Solomon Islands?

Solar power systems are now an affordable option for households looking to reduce their power bills and generate their own electricity. There is an increasing number of products and suppliers on the market, most of which will be able to be connected to the Solomon Islands grid.

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

How do solar panels produce electricity in the Solomon Islands?

Solar PV panels produce most power when they are pointed directly at the sun. In the Solomon Islands, solar modules should face north for optimum electricity production. The orientation of the panels will often have a greater effect on annual energy production than the angle they are tilted at.

Why does Solomon power use solar panels?

Solomon Power follows the Australian/ New Zealand standards for connection of solar panels to its electricity grid. This is to ensure the safety of its staff and customers, as well as ensuring that customers can be comfortable with their investments.

Which direction should solar panels face in the Solomon Islands?

In the Solomon Islands, solar modules should face north for optimum electricity production. The orientation of the panels will often have a greater effect on annual energy production than the angle they are tilted at. A minimum tilt of 10° is recommended to ensure self-cleaning by rainfall.
