

PDEOZE PowerContainer

South Africa New Energy Storage Industrial Park

Overview

Where will the battery energy storage project be implemented?

The Project will be implemented at approximately 17 sites, located within or adjacent to existing distribution substations of Eskom, across four provinces of South Africa. The Battery Energy Storage Project (Project) provides a solution to address both challenges.

How much energy storage capacity does South Africa have?

South Africa had 1,604.6kW of capacity in 2022 and this is expected to rise to 3,519.9kW by 2030. Listed below are the five largest energy storage projects by capacity in South Africa, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment.

Who owns the Red Sands battery energy storage system?

Updated 1st July 2025 - The Red Sands Battery Energy Storage System (BESS), set to be Africa's largest of its kind, has officially reached commercial close. Developed by Globeleq, which is 30% owned by Norfund, in partnership with African Rainbow Energy, the 153 MW/612 MWh project was signed off in June 2025 in Cape Town.

What is the Red Sands battery energy storage system (BESS) project?

Red Sands battery energy storage system (BESS) project. The project will span an estimated 5 ha in the Northern Cape, South Africa. Independent power company Globeleq and project partner African Rainbow Energy & Power.

Why is energy storage important in South Africa?

Experts say that widespread energy storage is vital to expanding the reach of renewables and speeding the transition to a carbon-free power grid - this is key to helping reduce South Africa's reliance on fossil fuels as it seeks to transition to clean energy.

What is Ilanga - thermal energy storage system?

The Ilanga I - Thermal Energy Storage System is a 100,000kW molten salt thermal storage energy storage project located in ZF Mgcawu, Upington, Northern Cape, South Africa. The thermal energy storage battery storage project uses molten salt thermal storage storage technology. The project will be commissioned in 2020.

Oct 5, 2025 · Globeleq and African Rainbow Energy finalise commercial agreements for a 153 MW energy storage project in South Africa, aimed at enhancing national grid stability and optimising peak energy management.

Updated 1st July 2025 - The Red Sands Battery Energy Storage System (BESS), set to be Africa's largest of its kind, has officially reached commercial close. Developed by Globeleq, ...

Jan 8, 2024 · Copenhagen Infrastructure Partners (CIP) and EDF-led consortium clinches preferred bidder status for three high-capacity battery energy storage projects in South Africa, totaling 257MW.

Nov 24, 2024 · The Oasis initiative represents South Africa's growing commitment to renewable energy and technological innovation. By integrating battery storage solutions into its energy framework, the ...

The components of the Project include 1,440 MWh of distributed battery storage, 60 MW of solar photovoltaic generation facility, and application software to optimize the performance of ...

Apr 8, 2024 · Globeleq to build Africa's largest standalone battery energy storage system in South Africa This new reliable energy infrastructure will help tackle power cuts known as load ...

Jan 8, 2024 · Copenhagen Infrastructure Partners (CIP) and EDF-led consortium clinches preferred bidder status for three high-capacity battery energy storage projects in South Africa, ...

Sep 10, 2024 · Listed below are the five largest energy storage projects by capacity in South Africa, according to GlobalData's power database. GlobalData uses proprietary data and ...

Jun 3, 2024 · Why South Africa's Energy Storage Boom Should Matter to You It's 2025, and South Africa's rolling blackouts have become as rare as a quiet day in Joburg traffic. How? ...

Aug 29, 2025 · Red Sands is the largest standalone battery energy storage system plant in Africa to reach commercial close.

The components of the Project include 1,440 MWh of distributed battery storage, 60 MW of solar photovoltaic generation facility, and application software to optimize the performance of distributed battery storage. The ...

Apr 8, 2024 · Globeleq to build Africa's largest standalone battery energy storage system in South Africa This new reliable energy infrastructure will help tackle power cuts known as load-shedding, and keep the lights on

Nov 24, 2024 · The Oasis initiative represents South Africa's growing commitment to renewable energy and technological innovation. By integrating battery storage solutions into its energy ...

Oct 5, 2025 · Globeleq and African Rainbow Energy finalise commercial agreements for a 153 MW energy storage project in South Africa, aimed at enhancing national grid stability and ...

Updated 1st July 2025 - The Red Sands Battery Energy Storage System (BESS), set to be Africa's largest of its kind, has officially reached ...

What is the Kathu solar thermal park - thermal energy storage project?The Kathu Solar Thermal Park - Thermal Energy Storage Project is a 100,000kW molten salt thermal storage energy ...
