

## **PDEOZE PowerContainer**

# **South Africa Republic Intelligent Energy Storage Cabinet Tender**

## Overview

---

What are South Africa's battery storage tenders?

South Africa's battery storage tenders mark a pivotal moment in the country's transition to a more sustainable energy future. The three tenders launched by the DMRE and Eskom are set to significantly increase the country's battery energy storage capacity, reduce carbon emissions, and stimulate economic growth.

What is a battery energy storage IPP tender?

In November 2023, South Africa announced preferred bidders for the first Battery Energy Storage IPP Procurement Programme tender, which – if all implemented in full – would add 360 MW of dispatchable battery storage capacity to the national grid, and are now expected to enter into power purchase agreements (PPAs) negotiations with Eskom.

What is a battery storage tender?

The first battery storage tender, initiated by Eskom, marked the beginning of a new era in South Africa's energy sector. This tender was a part of the Battery Energy Storage System (BESS) project, which aims to integrate renewable energy sources into the national grid.

What is the DMRE battery storage tender?

The third and most recent battery storage tender was launched by the DMRE in August 2023. This tender is part of South Africa's broader strategy to transition to a more sustainable energy future. The tender aims to add another 1,230 MWh of battery energy storage capacity to the national grid.

What are the DMRE energy tenders?

The Department of Mineral Resources and Energy (DMRE) has launched a series of tenders aimed at boosting the country's energy storage capacity. This blog will explore the details of the three major tenders and their

implications for South Africa's energy landscape. Image by Appolinary Kalashnikova Via Unsplash.

What is the battery energy storage programme (besipppp)?

The Battery Energy Storage Programme is a critical initiative aimed at enhancing South Africa's power system by providing essential ancillary services and increasing grid capacity through energy storage. The ancillary requirements for all the BESIPPPP Programmes are as follows: Supplemental reserves.
