

PDEOZE PowerContainer

Swiss non-standard solar panel shipment

Overview

Can heavy solar equipment be delivered in a shipping container?

Heavy solar equipment can't always be delivered in a standard shipping van or shipping container, it's at risk of being damaged during transit, and it needs to arrive onsite according to energy project timelines. Effective supply chain management requires top-notch renewable energy logistics.

How do solar panel shipments work?

Solar panel shipments are transported globally through a complex international supply chain - involving manufacturers, freight forwarders, foreign and domestic Customs brokers, warehousing providers, and last-mile logistics companies who ensure the panels get to their destination on time and on budget.

How do I ship solar panels overseas?

Ocean freight is typically the most cost-effective way to ship solar products overseas, while air freight is usually a faster option for projects with strict deadlines. Once a solar panel shipment arrives at the destination country, it can be moved inland through a variety of intermodal transport methods.

How much does a solar panel shipment weigh?

The exact weight and dimensions of a solar panel shipment varies widely across different models. Assuming a weight of around 50 lbs per commercial solar panel and a pallet that fits about 30 panels, a single pallet of solar panels could weigh upwards of 1500 lbs.

Can I ship a solar panel on a pallet?

Shipping a solar panel on a pallet is the cheapest and most efficient solution, as this service allows you to ship several solar panels at once. However, it is also possible to ship a single solar panel through our Express Service if you need an urgent delivery or through the Van Delivery Service if you require an

entire vehicle.

How do I protect my solar panels from damage during shipping?

To protect solar panels during shipping, follow these instructions: Inspect the solar panel before shipping for any obvious damage. During packing, place the sunny side (front side) facing the pallet. Add foam pads around the frame of the solar panel. Have the last solar panel sunny side up. Lastly, add edge protectors.
