Swiss solar panel applications

Overview

What does swissolar do?

On behalf of the Swiss Federal Office of Energy, Swissolar is mandated to survey the Swiss solar market and publish the annual installed capacity in the report: "Statistiques de l'énergie solaire: Année de référence 2022". The data is based on a survey amongst 398 companies active in the PV and solar thermal market.

Who surveys the solar market in Switzerland?

The Swiss Federal Office of Energy has been surveying the solar market in Switzerland for more than 20 years. Due to this long experience the quality of the data has been maintained, thanks as well to all the installers and distributors who are willing to complete the annual questionnaire.

Should solar panels be required in new buildings in Switzerland?

Since 2015, the Swiss government has published a recommendation for the energy policies in cantons. These regulations should include a requirement for PV in every new building. In a majority of cantons, a requirement of including about 10 W PV per square meter of heated area for new buildings is already implemented.

Why should you choose Swiss Solar AG?

The state of the art design of solar the packaging and solar modules makes the product emotionally attractive to the most demanding customers. Stylish packaging sets the product apart from other producers. To be part of SWISS SOLAR AG is to always be ahead.

Is Switzerland a good country to install solar panels in 2022?

Switzerland had its best year in terms of new PV deployment in 2022, with more than 1,000 MW of installed capacity, according to provisional statistics from Swissolar. At the end of December, the nation surpassed 4.6 GW of

cumulative installed solar capacity. From pv magazine Germany.

Who makes Swiss solar modules?

SSWISS GROUP AG manufactures high-quality solar modules and is leading and globally active technology company. SWISS solar modules are engineered in Switzerland and meet the highest quality standards . As an internationally recognized premium brand.
