The first energy storage power station is put into operation

Overview

on may 11, 2024, the first 10MWh (unit: megawatt-hours) sodium ion battery (hereinafter referred to as sodium battery) energy storage power station in China's new energy storage field was officially put into operation in Nanning, Guangxi. the power station is called Guangxi fulin.

on may 11, 2024, the first 10MWh (unit: megawatt-hours) sodium ion battery (hereinafter referred to as sodium battery) energy storage power station in China's new energy storage field was officially put into operation in Nanning, Guangxi. the power station is called Guangxi fulin.

The first phase of Datang Group's 100 MW/200 MWh sodium-ion energy storage project in Qianjiang, Hubei Province, was connected to the grid. From pv magazine ESS News site China's state-owned power generation enterprise Datang Group said on June 30 that it had connected to the grid a 50 MW/100 MWh.

On June 26, the 55MW/110MWh energy storage power station of China Resources Power successfully achieved full-capacity grid connection in one attempt, marking the first grid-side new-type energy storage project operated by China Resources Power Holdings Company Limited in Taizhou and also the first.

China's first large-scale lithium-sodium hybrid energy storage station was put into operation on Sunday in southwest China's Yunnan Province. The Baochi Energy Storage Station of China Southern Power Grid, located in Wenshan Zhuang and Miao Autonomous Prefecture, has an installed capacity of 400.

[China's first sodium ion energy storage power station put into operation] On June 30th, China's first 100 megawatt hour sodium ion energy storage project - the first phase of the Datang Hubei 200 megawatt hour sodium ion new energy storage power station project was officially put into operation.

On September 29, the Shandong Kouzhen Zongneng Energy Storage Power Station was put into operation and connected to the grid in Laiwu District, Jinan City. This is the first electrochemical energy storage power station

connected to the grid in Shandong Province, and it is also the first energy.

On May 25, the National New Energy Storage Pilot Demonstration Project - Southern Power Grid Baochi Energy Storage Station was put into operation in Wenshan Prefecture, Yunnan. This is the first large-scale lithium-sodium hybrid energy storage station in China, which realizes the "one-station.

The first energy storage power station is put into operation

Recently, the first large-scale grid side independent energy storage power station in Lucheng District, Zhejiang Province - Fengmen Energy Storage Station of Wenzhou Lucheng ...

Guangxi Fulin energy storage power station has been put into operation, with an expected annual power generation of 73 million degrees.

The Baochi energy storage station puts into use the world's first large-capacity sodium-ion battery developed by China, with a maximum response speed six times that of other existing sodium-ion batteries.

[China's first sodium ion energy storage power station put into operation] On June 30th, China's first 100 megawatt hour sodium ion energy storage project - the first phase of the Datang ...

China's first large-scale lithium-sodium hybrid energy storage station has been put into operation, capable of powering hundreds of thousands of homes, as sodium-ion batteries are more widely adopted.
