Total investment in energy storage battery projects in the United States

Overview

What is the largest battery storage project in the US?

At present, the 409 MW Manatee Energy Storage in Florida is the largest operating battery storage project in the U.S. Developers have scheduled more than 23 grid-scale battery projects, ranging from 250 MW to 650 MW, to be deployed by 2025.

What is the future of battery energy storage systems?

The battery energy storage systems industry has witnessed a higher inflow of investments in the last few years and is expected to continue the same trend in the coming future. According to the International Energy Agency (IEA), investments in battery energy storage exceeded USD 20 billion in 2022.

How many battery storage installations are there in the United States?

After showing a year-over-year increase of 80 percent in 2023, the capacity of battery storage installations in the U.S. was projected to reach almost 30 gigawatts by the end of 2024. That year, the number of operational and prospective battery storage projects grazed 1,000, with most of them located in California and Texas.

Who has delivered the battery energy storage project?

Audi, Etogas and MAN Energy Solutions have delivered the battery energy storage project. Additional information The Stuttgart-based plant manufacturer ETOGAS GmbH (formerly SolarFuel) has timely developed and built the world's largest power-to-gas plant. Customer and operator is the Audi AG.

Which energy storage technology is most popular in 2024?

Batteries became the main energy storage technology in the United States in 2024, surpassing hydro pumped storage. After showing a year-over-year increase of 80 percent in 2023, the capacity of battery storage installations in

the U.S. was projected to reach almost 30 gigawatts by the end of 2024.

Where are battery storage projects located?

That year, the number of operational and prospective battery storage projects grazed 1,000, with most of them located in California and Texas. Moss Landing, a hybrid natural gas plant for electricity generation paired with the largest battery plant operative in the U.S. as of January 2025, was located in the golden state.
