UK residential energy storage prices

Overview

Cost per kWh: The price per kWh of storage generally ranges from £265 to £415. Why is battery storage so popular in the UK?

With energy prices rising and a growing demand for sustainable energy solutions, battery storage solutions are becoming more popular among homeowners in the UK. A good home battery storage system allows you to store excess solar energy for later use, giving you more control over your energy consumption.

How is the UK's solar energy and battery storage sector changing?

Introduction The UK's solar energy and battery storage sector is undergoing a rapid transformation, bolstered by ambitious climate targets and supportive policies. Solar photovoltaics (PV) capacity has rebounded since the end of feed-in tariffs, while energy storage is scaling up to enhance grid reliability.

How much does a solar battery storage system cost?

The total cost to install a solar battery storage system, including a 4kWh battery, inverter and PV system, comes in at around £12,000 on average. How long will a 10kW home battery last?

The average solar battery storage system lasts around 10 to 15 years. This is provided it's properly installed and well-maintained.

What are the best home battery storage solutions in the UK?

Home battery storage is a game-changer, especially with the growing need for sustainability. In this 2025 Buyer's Guide, we'll take you through the best home battery storage solutions in the UK, featuring top products from Off-Grid Energy, including Lux Power, Growatt, Hanchu, and Pylon Tech. Why Choose Home Battery Storage?

How much does a solar battery cost in the UK?

But with battery prices varying from £4,000 for an entry-level 4kWh right up to a whopping £12,000 for a 16kWh model, choosing the right system for your home is vital. Here, we break down the latest solar battery system costs in the UK and help you choose the correct size solar battery for your home's energy usage.

Are solar battery storage systems becoming more in demand?

With energy prices rising, it's no wonder solar battery storage systems are becoming more in demand. Many homeowners are wising up to storing their excess solar energy, rather than it funnelling back to the grid.
