Vietnam Home solar System

Overview

How to choose a solar energy company in Vietnam?

As solar is becoming cheaper and more popular, choosing among the many solar energy companies in Vietnam is getting harder, especially so as each installer may offer you different packages, services and energy solutions. Finding the right solar installer for your roof is important in ensuring a hassle-free installation that you are satisfied with.

Where are solar panels installed in Vietnam?

This photo taken on 23 April, 2019 shows solar panel installations and a wind turbine at the Phu Lac wind farm in southern Vietnam's Binh Thuan province. (AFP Photo).

Why is solar energy important in Vietnam?

Driven by surging energy demand, economic growth and the looming threats of climate change, Vietnam has recognised solar energy as a critical solution for securing its energy future. As a result, solar energy is a cornerstone of the country's updated Power Development Plan (PDP8), which aims to reach 73 GW of capacity by 2030.

Is Vietnam a good place to buy solar panels?

This is the only local firm known to manufacture solar panels, with a market share of just 1 percent. Vietnam is slowly positioning itself on the global market as a leading exporter of solar panels, exporting to 50+ countries worldwide and making up a considerable share of the world's electricity supply pie.

How much solar power does Vietnam have?

The lead-up to the expiration of the initial solar feed-in tariff (FIT) of US\$93.5/MWh saw a large increase in Vietnam's installed capacity of solar photovoltaic (PV), from 86 MW in 2018 to about 4.5 GW by the end of June

2019. The number reached about 16.5 GW as of the end of 2020.

Why does Vietnam have a solar energy boom?

Vietnam has undergone one of the largest solar booms in Asia. This boom results from favourable government policies, rapidly growing energy demand and ideal conditions for solar energy. The country's updated Power Development Plan 8 will continue this trajectory, with solar making up most of the country's energy supply by 2050.
