# **Vietnam s solar energy storage policy wholesale**

## Overview

---

This policy move, effective throughout 2025, was formalized through Decision 988/QD-BCT issued by the Ministry of Industry and Trade (MOIT), building upon Circular 09/2025/TT-BCT. These updated FiTs aim to enhance grid reliability while aligning with the nation's broader energy.

This policy move, effective throughout 2025, was formalized through Decision 988/QD-BCT issued by the Ministry of Industry and Trade (MOIT), building upon Circular 09/2025/TT-BCT. These updated FiTs aim to enhance grid reliability while aligning with the nation's broader energy.

On April 10, 2025, the Ministry of Industry and Trade (MOIT) issued Decision 988/QD-BCT ("Decision"), updating Vietnam's feed-in tariff (FiT) rates for solar power projects. These tariffs, effective under the framework of Circular 09/2025/TT-BCT issued on February 1, 2025 ("Circular"), will apply.

Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS). This policy move, effective throughout 2025, was formalized through Decision.

In 2025, solar energy costs in Vietnam are clearly outlined by the Ministry of Industry and Trade's policy decisions. Factors like regional pricing frameworks and plant types, along with the policy shift from a FIT mechanism to competitive bidding, play crucial roles in guiding these costs amid the.

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for.

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems. The updated scheme highlights the growing importance of storage in stabilizing the.

Vietnam's solar power sector is governed by a number of key regulations and policies aimed at promoting the development of renewable energy while managing the challenges associated with rapid growth. The FiT program has been a major driver of solar power development in Vietnam, offering a tariff of.

## Vietnam s solar energy storage policy wholesale

---

New solar energy cost regulations for 2025 provide a clear price framework and encourage storage technology development, while tax incentives maximize investment benefits. Policy changes are poised to ...

The Vietnamese authorities released the feed-in tariff levels for ground-mounted and floating PV plants, with or without storage.

The Vietnamese authorities released the feed-in tariff levels for ground-mounted and floating PV plants, with or without storage.

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, ...

Vietnam can leverage domestic solar manufacturing to meet domestic demand, implement direct power purchase agreements (DPPAs) enabling private renewable supplies, accelerate grid and battery storage ...

Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage ...

Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on ...

Vietnam's renewable energy landscape is entering a new phase of reform with the introduction of Decree 57/2025/ND-CP ("Decree 57"), which reshapes the regulatory

environment through capped tariffs, ...

New solar energy cost regulations for 2025 provide a clear price framework and encourage storage technology development, while tax incentives maximize investment ...

Vietnam can leverage domestic solar manufacturing to meet domestic demand, implement direct power purchase agreements (DPPAs) enabling private renewable supplies, ...

Vietnam's renewable energy landscape is entering a new phase of reform with the introduction of Decree 57/2025/ND-CP ("Decree 57"), which reshapes the regulatory ...

It mandates energy storage requirements for concentrated solar and supports self-consumption rooftop solar, signalling a long-term commitment to renewable energy integration.

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage ...

Resolution No. 70, issued on August 20, 2025 by the Politburo, Vietnam's highest decision-making body, is seen as a strategic "pathway" for green and renewable energy ...

It mandates energy storage requirements for concentrated solar and supports self-consumption rooftop solar, signalling a long-term commitment to renewable energy integration.

Vietnam's Ministry of Industry and Trade (MOIT) has unveiled a revised feed-in tariff (FIT) framework for solar power, incorporating location-based pricing and, for the first ...

We analyze the business implications of Decision 988/QD-BCT, which revises Vietnam's feed-in tariff (FiT) rates for solar power projects.

We analyze the business implications of Decision 988/QD-BCT, which revises Vietnam's feed-in tariff (FiT) rates for solar power projects.
