

## **PDEOZE PowerContainer**

# **Waterproof installation of double-glass modules**

## Overview

---

What is the installation manual for JA Solar PV bifacial double-glass modules?

This document is the installation manual for JA Solar PV bifacial double-glass modules. It provides guidance on safety, product identification, installation conditions, mechanical installation, electrical installation, grounding, and operation and maintenance of the modules.

What is a double glass module?

Double glass module contains two sheets of glass, whereby the back sheet is made of heat strengthened (semi-tempered) glass to substitute the traditional polymer backsheet. With \* Corresponding author. Tel.: +86 13776101913; fax: +86 51268961413.

How to unpack JA Solar modules?

Please unpack the package of JA Solar modules according to “JA Solar Modules Unpacking Instruction”. Do not lift the modules by grasping the module’s junction box or electrical leads in any condition. Do not stand or step on the modules. Do not drop the modules on another module.

What are the requirements for a module mounting structure?

The modules mounting structure must be made of durable, corrosion-resistant and UV-resistant material. Modules must be securely attached to the mounting structure. of the modules is not covered by snow for any length of time. In addition, ensure that the lowest portion of the.

Can a PV module be connected directly in series?

Modules with different electrical characteristics must not be connected directly in series. Parallel wiring operation at the lowest temperature expected at the PV system location.  $\beta V_{oc} \times (25-T)$ . T is the lowest expected ambient temperature at the system location.  $\beta$  (%/°C) is the temperature.

How do you secure a solar module?

Modules must be securely attached to the mounting structure. of the modules is not covered by snow for any length of time. In addition, ensure that the lowest portion of the modules is placed high enough so that it is not shaded by plants or trees or damaged by flying sand. behind the modules and to prevent wiring damage. warranty.

This general manual applies to the installation, maintenance and use of the double glass solar modules manufactured by ZNSHINE PV-TECH Co.,Ltd. (hereinafter referred to as "ZNSHINE ...

The module mounting structure must be made of durable, corrosion-resistant and UV-resistant material. All mounting hardware (bolt/flat washer/split washer/nut) should be stainless steel M8 ...

Summary: Discover how double glass module waterproof installation techniques enhance solar panel durability and efficiency. This guide covers best practices, industry data, and innovative ...

This INSTALLATION MANUAL applies to installing, maintaining, and using the double glass and bifacial dual-glass solar modules manufactured by Hounen Solar Cambodia Inc or Hounen ...

This document is the installation manual for JA Solar PV bifacial double-glass modules. It provides guidance on safety, product identification, installation conditions, mechanical ...

The low/normal level of load condition is applicable to the installation in most of environmental conditions: the maximum static load on the back of the modules is 2400 Pa(i.e. wind load), and ...

The installation of the modules shall be strictly carried out by professional technicians. Please read this manual carefully before installation.

This document is the installation manual for JA Solar PV bifacial double-glass modules. It provides guidance on safety, product identification, installation conditions, mechanical

installation, electrical installation, grounding, and ...

When installing modules in light rain, morning dew, take appropriate measures to prevent water ingress into the connector. Do not allow children or unauthorized persons near the installation ...

During Modules installation and routine maintenance, operators should follow all safety precautions in this manual and local regulations. If you have any questions, please contact our ...
