# **What is the price of 19 kilowatt solar panels**

## Overview

---

A small residential solar panel system costs around \$14,210 before considering any financial incentives. On the bright side, that price effectively drops to \$9,937 after considering the full federal solar tax credit. Depending on your household energy needs, you might need a larger or.

A small residential solar panel system costs around \$14,210 before considering any financial incentives. On the bright side, that price effectively drops to \$9,937 after considering the full federal solar tax credit. Depending on your household energy needs, you might need a larger or.

The cost of solar panels depends mainly on system size, equipment quality, installation complexity, location and available incentives. Financing solar panels might be a good idea if your loan payments are less than your power bill. A small residential solar panel system costs around \$14,210 before.

A 19kW solar system can generate 19 kilowatts of power under ideal conditions, typically comprising around 48-64 solar panels depending on the efficiency and wattage of the panels used. As of 2024, the average cost of a 19kW solar system in the United States ranges from \$38,000 to \$52,000 before.

As of 2025, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which.

You'll pay an average of \$13,884 to install a 5 kilowatt (kW) solar panel system in New York before any available incentives. Solar panels typically last 25-30 years, generating free electricity and protecting you from rising utility rates for decades. Compare multiple offers and save up to 20% Why.

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type.

The cost of solar panels typically starts at \$20,000. Thanks to the federal 30% tax credit and NY State rebates, your final cost can be much lower, and long-term savings can exceed \$100,000. These are great numbers to look at, but what does it really mean?

Here's a full solar panel cost breakdown.

## What is the price of 19 kilowatt solar panels

---
